PROPREP AND THE ACCESS PROJECT LAUNCH PARTNERSHIP Education organisation aims to provide disadvantaged STEM undergrads with reliable resources

Proprep is delighted to be working with The Access Project, a UK-based education charity that supports students from disadvantaged backgrounds to secure places and succeed at top universities. Through a unique combination of in-school mentoring and personalised tuition, they aim not only to raise students' learning outcomes, but to improve their confidence in achieving at university.

Proprep will provide The Access Project's STEM alumni, transitioning from A-Level to undergraduate study and from 1st to 2nd year, with access to Proprep's bite-sized video tutorials and thousands of practice questions. These students will use Proprep's resources to cement their understanding of the topics they find most difficult, apply their knowledge to practice exercises, and check their answers against video solutions.

Our partnership aims to address diversity challenges in STEM and give all students the opportunity to succeed. Katharine Jackson, Proprep's CEO, said: "We are delighted to help The Access Project with their mission to ensure that every young person regardless of background can make the most of education and succeed at the top universities, unlocking their potential and ultimately enabling a fairer society."

Alice Reilly, The Access Project's Head of University Partnerships, said: "We're really proud to be partnering with Proprep. We work hard to get disadvantaged young people into university, and ensure they transition into university life well. Through working with Proprep UK, our students will receive additional support at university to help them succeed. Currently 73% of students from disadvantaged households graduate with a 2:1 or a first-class degree in comparison to 83% from more advantaged households, so this partnership will support us in levelling the playing field for disadvantaged young people whilst they're at university."

About Proprep: Proprep is an education technology company with operations in the UK and the US, which has helped over 500,000 STEM students worldwide to maximise their academic potential since its inception. They focus on customised e-learning resources, specifically bite-sized video tutorials taught in whiteboard technology. Proprep is a subsidiary of Kvasir Education, listed on the Tel Aviv Stock Exchange as KVSR.
